ABOUT THE AUTHOR

The author of all these studies is Len McMeikan. He always loved science and as a boy was deceived into thinking that the claims of "proven" evolution by pseudo scientists were true. As a consequence he while quite young, (about 12), became a staunch atheist and evolutionist. Some years later in his late teens, God got through to him, and he realised that the atheist "scientists" claims were all based on lies, deception and fraud. He then found that true science shows that the dating systems relied upon by atheists are very unreliable, especially for anything more than about 2 thousand years old. True science also shows that everything is in a state of atrophy (is running down). This speaks not of evolution to a higher order, but if anything, to devolution to a lower order, and that rules out improvement by "natural selection". Len, now in his latter years has compiled these studies in the hope and prayer that God will use them to help people better understand God's Word
